Lexmark Keyboards:

For Superior Quality, Performance And Leading Technology

LEXMARK ™

Make Your Mark

The *Classic Touch* 101 Key Keyboard

Millions of the award winning *Classic Touch* 101 Key Keyboards have been sold. Its positive, tactile feedback from Lexmark's patented buckling spring actuators gives a unique touch and feel. Plus, based on a 40 hour work week, this unit's MTBF (Mean Time Between Failure) is an incredible 26 years of operation. Extremely durable, tested to 25 million keystrokes, the *Classic Touch* 101 Key Keyboard has earned a world-wide reputation as a trouble-free, efficient product. The Enhanced QT is now available featuring rubber dome technology for noise sensitive environments. Both models are available with Erase-Eaze which makes corrections easier and quicker.

- IBM® PS/1®, PS/2®, AT® and compatible models
- Curved profile, user-adjustable angle
- Audible and tactile feedback (Classic Touch)
- Crisp, tactile feedback (Enhanced QT)
- Spill resistant design
- Numeric keypad
- Cursor Keys
- Erase-Eaze spacebar feature available
- Worldwide language availability
- 12 function keys
- Detachable 6 pin mini-DIN or 5 pin DIN coiled cable
- Removable Lexmark keycaps
- Keycaps available in custom colors and graphics
- Keyswitch life: 25 Million min. (Classic Touch)
- Keyswitch life: 10 Million min. (Enhanced QT)
- Dimensions: 19 3/8" X 8 1/4" X 1 3/4"

Classic Touch

The *Classic Touch* 101 Key Keyboard With Integrated 16mm or 25mm Trackball

By eliminating mouse pads and keyboard cables, this Lexmark keyboard offers a clutter-free workspace. A variation of the industry-standard *Classic Touch* 101, this keyboard features the built-in pointing device. The 16mm Trackball, compatible with IBM PS/1 and PS/2 computers only, allows you to work without ever lifting your hands from the keyboard. The 25mm Trackball is located for easy thumb or finger manipulation. Available in both PS/2 mouse port or serial interface models, this keyboard utilizes an innovative Y-cable for ease of operation. Both keyboards are available with Erase-Eaze feature.

- **IBM PS/1, PS/2 (16mm)**
- **IBM PS/1, PS/2, 286 AT and compatible models (25mm)**
- **Curved profile, user-adjustable angle**
- **Spill resistant design**
- **Audible and tactile feedback**
- **Numeric keypad**
- **Cursor keys**
- **Erase-Eaze spacebar feature available**
- **12 function keys**
- **Worldwide language availability**
- **Removable trackball for easy cleaning**
- **"Mouse 1" and "Mouse 2" buttons with locks**
- **Mouse driver diskette with speed control**
- **Removable Lexmark keycaps**
- **Keycaps available in custom colors and graphics**
- **Single detachable Y-cable**
- **Keyswitch life: 25 Million min.**
- **Dimensions: 19 3/8" x 8 1/4" x 1 3/4"**
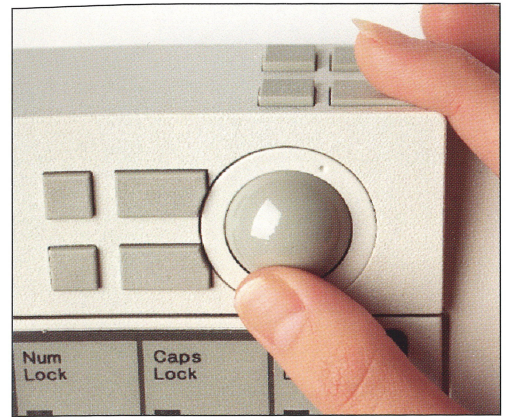

### 25mm Trackball with Dual Buttons (above)

Our 25mm Trackball places the pointing device within easy reach and enables you to accelerate the cursor across the page without your hand ever leaving the keyboard. One set of mouse buttons with locks is located to the right of the trackball. On the back edge of the keyboard, you'll find another set identical to those on the front of the keyboard. These "twin" sets of mouse buttons are provided for your comfort and convenience, an ideal option for resting your arm on the desktop or while using the keyboard on your lap.

16mm Trackball

Lexmark has placed this version of the integrated pointing device between the Enter Key and Cursor Keys so that complete control is at your fingertips. The Classic Touch 101 Key Keyboard with the built-in 16mm Trackball places the "Mouse 1" and "Mouse 2" buttons within easy reach. Both have corresponding lock buttons.

The Spacesaver
84 Key Keyboard

When space is limited, the Lexmark Spacesaver delivers big capabilities in a small, compact design. Although the Spacesaver requires 25 percent less desktop space, it offers many features found in Lexmark's larger keyboards, including 12 function keys, separate cursor keys and Lexmark's classic tactile feedback. Custom keycaps for various software applications are also available. All these features combined in a compact model, plus the added advantage of Lexmark's legendary reliability are found in the spacesaver keyboard.

- **IBM PS/1, PS/2, AT and compatible models**
- **Curved profile, user-adjustable angle**
- **Audible and tactile feedback**
- **Embedded numeric keypad**
- **Cursor keys**
- **12 function keys**
- **Worldwide language availability**
- **Detachable 6 pin mini-DIN or 5 pin DIN coiled cable**
- **Removable Lexmark keycaps**
- **Keycaps available in custom colors and graphics**
- **Keyswitch life: 25 Million min.**
- **Dimensions: 16" x 7 1/2" x 1 3/4"**

The Quiet Touch
Keyboard

The Lexmark Quiet Touch is the absolute choice for noise sensitive work places with limited space such as banks, hospitals, libraries and executive offices. Replacing the traditional buckling spring mechanisms with specially engineered rubber domes allows the Quiet Touch to operate quietly with crisp, tactile feedback. This model still features all the functions of the Lexmark *Classic Touch* 101 Key Keyboard plus the flexibility of a detached, space-saving numeric pad. With the optional numeric keypad, the Quiet Touch requires only two-thirds the desktop space required of the *Classic Touch* 101 Key Keyboard.

- **IBM PS/1, PS/2, AT and compatible models**
- **Low profile, user-adjustable angle, small footprint**
- **Detached numeric keypad (optional with 14" or 36" cable)**
- **Cursor keys**
- **12 function keys**
- **Detachable 6 pin mini-DIN or 5 pin DIN coiled cable**
- **Keyswitch life: 10 Million min.**
- **Dimensions: 13" x 6 1/3" x 1 3/4"**
- **Numpad Dimensions: 3 3/4 " x 6 1/3" x 1 3/4"**

The Easy Touch 101 Key Keyboard

Lexmark's Easy Touch combines the conventional 101 Key layout with rubber dome technology for quiet, reliable operation. This model features 12 function keys, separate cursor keys, as well as a separate numeric keypad. Replacing the buckling spring mechanisms with rubber domes delivers an exceptionally quiet, crisp touch with tactile feedback. If quiet operation, quality and performance is the combination you're seeking, the Easy Touch is the ideal choice.

- **IBM PS/1, PS/2, AT and compatible models**
- **Compact profile, user-adjustable angle**
- **Crisp, tactile feedback**
- **Separate numeric keypad**
- **Separate cursor keys**
- **12 function keys**
- **Worldwide language availability**
- **Attached 6 pin mini-DIN or 5 pin DIN flat cable**
- **Keyswitch life: 10 Million min.**
- **Dimensions: 19 3/8" x 8 1/4" x 1 3/4"**

The Thinlined & Streamlined 101 Key Keyboards

The Lexmark Streamlined Keyboard with classic tactile feedback is the ideal choice when your work area has limited space but your assignments demand high level capabilities. You can enjoy the reliability and features of the standard 101 key keyboard with a 30% space savings. The Thinlined keyboard's key mechanisms utilize rubber domes which provide an extremely quiet, crisp touch with tactile feedback. For those who need the advantages and features of the Streamlined keyboard for use in a "quiet" environment, the Thinlined keyboard is for you!

- **IBM PS/1, PS/2, AT and compatible models**
- **Compact profile, user-adjustable angle**
- **Audible and tactile feedback (Streamlined)**
- **Crisp, tactile feedback (Thinlined)**
- **Separate numeric keypad**
- **Separate cursor keys**
- **12 function keys**
- **Worldwide language availability**
- **Attached 6 pin mini-DIN or 5 pin DIN flat cable**
- **Keyswitch life: 10 Million min. (Thinlined)**
- **Keyswitch life: 25 Million min. (Streamlined)**
- **Dimensions: 17 3/4" x 6 1/4" x 1 1/2"**

Shown with optional color Keycaps.

Lexmark Palm Rest

The Palm Rest is Lexmark's solution to working hands that may need occasional rest. This comfortable foam rubber pad, blanketed with a satin-like cover, fits snugly against the lip of your keyboard. Rubber backing keeps the Palm Rest firmly in place.

Keyboard Personalization

Our keyboards can be customized with simple, snap-on key covers to enhance frequently used keys or to accommodate special software applications. All keyboards in the Lexmark family can be personalized with optional keycaps and graphics for foreign language applications. Even a WordPerfect® keycap set is available for beginners as well as experienced users.

Lexmark's Keyboard Personalization is an efficient and attractive alternative to templates or taped-on reminders.

DIN And Mini-DIN Cables

DIN Cable: For use with Lexmark's Classic Touch, SpaceSaver and Quiet Touch keyboards operating with IBM compatible computers using a 5 pin DIN connector.

Mini-DIN Cable: For use with Lexmark's Classic Touch, SpaceSaver and Quiet Touch Keyboards operating with IBM, PS/1 and PS/2 using the 6 pin mini-DIN connector.

LEXMARK™

Make Your Mark

The *Classic Touch* Keyboard With Integrated Pointing Stick And Erase-Eaze.™

The *Classic Touch* keyboard is the first Lexmark keyboard to feature a built-in pointing stick, making it much easier to move around on the screen. The pointing stick is positioned in the home row area, near the keyboard's center, making it easily accessible to left-hand or right-hand users. Touch-sensitive, the harder you press, the faster the cursor moves. Plus, with Erase-Eaze, you can make fast corrections with a single touch. The spacebar is split into two keys, so you can use the left key to backspace and delete, while the right key operates as a normal spacebar. The function of these keys can be interchanged or both can be used as a spacebar. For noise sensitive environments, the Enhanced QT is available with all the features.

- IBM PS/1, PS/2 and compatible models
- Curved profile, user-adjustable angle
- Spill resistant design
- Audible and tactile feedback (Classic Touch)
- Crisp, tactile feedback (Enhanced QT)
- Numeric keypad
- Erase-Eaze spacebar feature available
- Cursor keys
- 12 function keys
- Worldwide language availability
- Mouse driver diskette with speed control
- Removable Lexmark keycaps
- Keycaps available in custom colors and graphics
- Single detachable Y-cable
- Keyswitch life: 25 Million min.
- Dimensions: 19 3/8" x 8 1/4" x 1 3/4"

Integrated Pointing Stick and Erase-Eaze Space Bar

Lexmark's new pointing stick is positioned in the home row area, so your fingers never leave the keyboard to move the cursor. It is easily accessible to left-hand or right-hand users, plus the harder you press, the faster the cursor moves.

The Erase-Eaze located on the spacebar is split into two keys. Use the left key to backspace and delete and the right key for a normal spacebar.

Lexmark is dedicated to international leadership in technology and service.
We are committed to providing products of unsurpassed quality and value, backed by responsive technical support and service.

Our Notebook Keyboards

Original Equipment Manufacturers will appreciate the performance and reliability found across the board in Lexmark's line of notebook keyboards. These notebook keyboards developed with rubber dome technology offer options of pointing sticks, 16mm trackballs or integrated mouse keys. Available in all major languages, Lexmark's keyboards have a standard 101 key function emulation in a notebook keyboard with an embedded numeric keypad. Plus, you can customize these keyboards with a variety of options, such as color and graphics packages. In all, no other keyboard gives OEMs more flexibility and performance than Lexmark's.
